

Cato Middle College High School

A Message from the Principal

To our Cato Middle College High School families:

This is our third School Progress Report, which we are sending to you so that you may be fully informed about our students' academic progress, our staff and our school environment.

Cato Middle College High School celebrated its second graduating class in 2010. Our 40 seniors graduated with an average of 30 semester hours of transferable college credits and earned more than one million dollars in scholarships. These college-credit hours were earned by attending Central Piedmont Community College (CPCC) at no expense to the students or their families. We have enrolled 142 students for the 2010-2011 school year, a 36 percent enrollment increase over last year.

The school opened in fall 2007 and is the first and only CMS middle-college program. Located on the Cato campus of CPCC, the school was created as part of the governor's initiative to include a middle college in every public school district in North Carolina.

The purpose of Cato Middle College is to provide students with the opportunity to earn college credit while still in high school. Our staff members view their roles as gatekeepers between high school and college; classes are designed to challenge students intellectually, as well as prepare them for the demands of the typical college class.

During our first three years, Cato Middle College was recognized as an Honor School of Excellence under the North Carolina ABCs program. In each of those years, we achieved High Growth status. For the 2009-2010 school year, more than 95 percent of our students received a passing rate on the End-of-Course exams. Our students performed at the highest rate of all CMS and North Carolina high schools.

All Cato students take their required high school classes at the Cato campus and they may take their college classes at any of the CPCC campuses. Cato Middle College classrooms are equipped with the latest

2009-2010 KEY FACTS

Data effective as of spring 2010

Grades

11 - 12

School Population

- Students: 91
- Classroom Teachers: 4
- Support Staff:
 - 1 Counselor
 - 2 Other

Student Demographics

- African-American.....58.2%
- White.....24.2%
- Hispanic.....7.7%
- Asian.....5.5%
- Other.....4.4%
- Economically.....52.7% disadvantaged students

Additional Facts*

- Per-pupil expenditure \$5,878
- Teacher-to-pupil ratio 1:11
- Student-mobility rate 9%

(Principal's message continued)

technology, and students have the same access as any other CPCC student to all libraries and privileges.

The middle-college experience serves as a comfortable transitional period for juniors and seniors between high school and college.

The Cato faculty consists of six certified staff members: the principal, four teachers and one counselor. Together, we monitor student progress and advise students on academic courses and career preparation. Required high school courses are taught by outstanding CMS teachers who collaborate in developing an integrated curriculum. College courses are taught by CPCC instructors.

Students participate in 90-minute CMS honors or Advanced Placement courses. They round out their schedule with a variety of college courses for which they can earn high school and transferable college credit. Students new to the program take the CPCC College Success course during their first semester to help acclimate them to college life.

Cato students are required to take the college Accuplacer Placement Test to determine the level of college courses they may take. They are also required to meet and maintain certain eligibility requirements in order to be selected for, and remain in, the program.

It is our mission to prepare students to leave Cato Middle College High School with a jump-start on their college education and with a focused plan and passion to succeed in future challenges.

Sincerely,
Joey Burch
Principal

What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

REACH FURTHER.

Cato Middle College High School

PROGRESS REPORT

CMS 2010 Strategic Plan Goals	Key Performance Measures	CMS 2010 Goal	CMS High Schools 2009 - 2010	Our School 2008 - 2009	Our School 2009 - 2010
<p>High Academic Achievement</p> <p>▶ Because of federal privacy regulations, the actual values for these measures are not shown if the percentage is greater than 95 percent or less than 5 percent.</p> <p>Students who do not pass the End-of-Course tests may take the test again. Retests often raise a school's score at least slightly, because some students pass the test on the second try. Retest results were not included in school scores until 2009-2010. Comparing the 2008-2009 scores and the 2009-2010 scores is therefore not valid, because the scores were not calculated the same way.</p> <p>Disparity between socioeconomic groups is shown as a positive percentage when non-economically disadvantaged students outscore economically disadvantaged students; a negative percentage indicates the reverse.</p> <p><i>Data effective as of 8/27/10</i></p>	▶ Students performing at or above standard on EOC composite tests	80%	84%	>95%	>95%

multiple survey items may have been used to create a composite

⁵ Per 100 students

CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

► Adequate Yearly Progress (AYP)

Our school **DID** make AYP

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit www.dpi.state.nc.us/nclb/abcayp/overview/ayp

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

► ABC Designation

Our school's designation: **Honor School of Excellence (DID meet high growth expectations)**

Proficiency	2008-09: 98%	2009-10: 100%
--------------------	--------------	----------------------

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (below); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

► Average Growth

State Standard	Our School:	2008-09	2009-10
80		87.3	89

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Course assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

► Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		73.6%	84%

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

► Adjusted Pass Rate on Advanced Placement (AP) Tests

Expectation	Our School:	2008-09	2009-10
100%		90.9%	NA

AP tests are administered by the College Board and give students the opportunity to earn college credit. Some high school students are predicted to pass AP tests, based on their performance on the Preliminary SAT (PSAT). This measurement reflects the cumulative AP test success rate among those seniors predicted to pass. It is important to note that all students are encouraged to take AP tests, but in order not to penalize schools for having high expectations for all students, not all scores are included in this measurement.

► Participation Rate in Weighted Courses

Expectation	Our School:	2008-09	2009-10
100%		>95%	>95%

Students with the skills to be successful are defined as those on grade level when entering high school. We offer weighted courses to those students as a means of challenging them academically and encouraging in-depth study within a single subject. The proportion of students who started high school on grade level, and who take three or more weighted courses by the end of senior year, measures how much a school encourages students to push themselves.

► Participation Rate in Advanced Placement (AP) or International Baccalaureate (IB) Courses

Expectation	Our School:	2008-09	2009-10
100%		80%	NA

AP and IB courses are the most challenging programs available in high school. The International Baccalaureate is a global educational program recognized for its rigor. Some high school students are predicted to be successful in AP courses, based on their performance on the Preliminary SAT (PSAT). This measures how many of these identified seniors have actually enrolled in AP and IB courses.

► Graduation Rate for Students Who Enter Ninth Grade

	2008-09	2009-10
State Comparison:	71.8%	74.2%
Our School:	>95%	>95%

Students completing kindergarten through 12th grade is a goal for everyone involved in education. We compare the number of students who start ninth grade with those who earn a diploma within four years, taking into account that some students transfer in from other schools and some transfer out of our school.

► SAT Rates and Results

Percentage of seniors taking the SAT:	2008-09	2009-10
Nation	46%	47%
State	63%	63%
Our School	77.2%	92.5%
Average SAT score:	2008-09	2009-10
Nation	1509	1509
State	1486	1485
Our School	1514	1547

The SAT is a nationally used assessment of high-level math, reading and writing skills. It is used to assess college readiness and the results are calculated by the state. (Data provided by the North Carolina Department of Public Instruction.)

► Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	98.7%	100%
Encouragement	100%	97.2%
Engagement	98.6%	100%

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

► Return-on-Investment Index

CMS High School Index: 56.7
Our School Index: 53.1

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools.
