

▶ Long Creek Elementary School

A Message from the Principal

To our Long Creek Elementary School families:

As part of our ongoing focus on communication, we would like to present our third School Progress Report. We are proud to share this information with our families so that you may be fully informed about our students' academic progress, our outstanding staff and our school environment.

At the end of last year, all of our third- through fifth-grade students took the North Carolina End-of-Grade tests. In math, 81.4 percent of students performed at or above grade level, a decrease of four percent from the previous year. In reading, 75 percent of students were proficient, nearly identical to our 2008-2009 result. In fifth-grade science, 61 percent of students were proficient, an increase of six percent over the previous year. Our overall rate of proficiency was 75.8 percent. This means that we achieved Expected Growth under the North Carolina ABCs. All of our students continue to make great strides in their academic performance.

You will see in this report that Long Creek made Adequate Yearly Progress (AYP), the standard set for schools by the No Child Left Behind Act, by meeting all 17 of our targets. This is the second consecutive year that Long Creek has made AYP.

We are very proud of our staff and students in making AYP and achieving Expected Growth. We look forward to continuing this trend. Furthermore, our staff has worked diligently to continue narrowing the achievement gap between the various subgroups that make up the student population. We still have room for improvement and will continue to focus our instruction based on the needs of each student, while ensuring that all students are held to high expectations.

(Principal's message continued on next page)

2009-2010 KEY FACTS

Data effective as of spring 2010

Grades

Pre-K - 5

School Population

- Students: 483
- Classroom Teachers: 27
- Support Staff:
 - 0.5 Assistant Principals
 - 3.5 Speech Pathologists
 - 2 Exceptional Children Teachers
 - 2 Academic Facilitators
 - 0.6 Talent Development Teachers
 - 1 Counselor
 - 33 Other

Student Demographics

- African-American.....44.9%
- White.....39.3%
- Hispanic.....6.2%
- Asian.....3.1%
- Other.....6.4%
- Economically 44.1% disadvantaged students

Additional Facts*

- Per-pupil expenditure\$5,589
- Teacher-to-pupil ratio 1:21
- Student-mobility rate 14%

▶ Long Creek Elementary School

(Principal's message continued)

In addition to the academic data in this document, you will find information about the qualifications of our teachers. What the report does not show is that six additional staff members are either currently studying for master's degrees or working toward National Board certification. Our staff members truly believe that education is a lifelong process, not just for students, but also for educators.

At Long Creek, our focus on high academic expectations and strong character permeates the school building and is shared by our staff and, most importantly, our students. Our Mighty Mustangs continue to perform very well under the expectations we have set. We encourage them to act safely, respectfully and responsibly at school, at home and in our community.

This is an exciting time in the 90-year history of our school, especially as we are now in our new facility.

I eagerly anticipate the further opportunities that our new campus will afford us in meeting the needs of all students at Long Creek. Finally, I would like to express my appreciation to all of our families for being a part of the past, present and future successes at Long Creek Elementary.

Sincerely,
Chad O. Thomas
Principal

What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

REACH FURTHER.

²Based on responses to surveys; multiple survey items may have been used to create a composite

³Incidents per 100 students

⁴Per 100 students

CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

▶ Adequate Yearly Progress (AYP)

Our school **DID** make AYP
(17 of 17 goals met)

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit www.dpi.state.nc.us/nclb/abcayp/overview/ayp

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

▶ ABC Designation

Our school's designation: **School of Progress**
(**DID** meet growth expectations)

Proficiency:	2008-09	2009-10
	76.8%	75.8%

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (at right); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

▶ Average Growth

State Standard	Our School:	2008-09	2009-10
80		83.7	80

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Grade assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

▶ Amount of Growth for Students in the Lowest-Achieving Group

Our School 2008-09: 83.2 **Our School 2009-10: 73.2**

Are we helping our low achievers catch up? Historically, some economically disadvantaged and minority students have trailed their classmates in academic achievement. This is called the achievement gap, and closing it is one of the biggest challenges in public education. If the lower-achieving students at a school show academic growth at a faster rate than higher-achieving students, the achievement gap is narrowed. When the score for this measure is higher than the Average Growth for the school, the school is closing the achievement gap.

▶ Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		64.8%	51.3%

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

▶ Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	93.5%	92%
Encouragement	92.6%	98.2%
Engagement	93.8%	95.7%

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

▶ Return-on-Investment Index

CMS Elementary School Index: 50.9 **Our School Index: 49.1**

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools. [Click here for more information.](#)

For more information on our school's performance, visit <http://pmd.cms.k12.nc.us>
