

# ▶ Midwood High School

## A Message from the Principal

To our Midwood High School families:

This is the third School Progress Report for Midwood High. We are sending this to you so that you may be fully informed about our students' academic progress, our staff and our school environment.

Midwood High is a ninth-grade transitional program for students who feed into West Mecklenburg, West Charlotte and E.E. Waddell high schools, but who are not ready academically and emotionally for the larger, comprehensive setting.

To be eligible to attend Midwood, students must be 15 1/2 years old before Sept. 1 of the year they enter Midwood, have had at least one retention in middle school and/or a score of Level I or II on eighth-grade End-of-Grade math and/or reading tests.

Midwood's purpose is to provide a number of specialized academic services and social skills for each student. For example, in order to provide individualized math and English instruction, we offer small classes with one-on-one tutoring made available through our Title I status. Additionally, we place significant emphasis on social and behavioral growth to promote character development, and we work with Communities In Schools to reduce the number of students who drop out during this critical year of their education.

Our instructional program consists of literacy and English, pre-algebra and algebra, and a choice of seven electives that include health/PE, world history, career management, computer skills, creative writing and leadership.

This progress report for Midwood High shows a significant improvement in academic achievement last year. In spring 2010,

*(Principal's message continued on next page)*

## 2009-2010 KEY FACTS

Data effective as of spring 2010

### Grades

9

### School Population

- Students: **185**
- Classroom Teachers: **20**
- Support Staff:
  - 1 Assistant Principal
  - 0.1 Speech Pathologists
  - 2 Exceptional Children Teachers
  - 1 Academic Facilitator
  - 2 Counselors
  - 13 Other

### Student Demographics

- African-American..... **91.4%**
- White..... **2.2%**
- Hispanic..... **3.8%**
- Asian..... **0.5%**
- Other..... **2.2%**
- Economically..... **89.1%** disadvantaged students

### Additional Facts\*

- Per-pupil expenditure ..... **\$9,686**
- Teacher-to-pupil ratio ..... **1:12**
- Student-mobility rate ..... **14%**

*\*Click here for more information.*

# ► Midwood High School

*(Principal's message continued)*

74 percent of our students were eligible to take the English I and/or Algebra I exam, an increase in eligibility of 30 percent from the previous year. Of those students, 65 percent were proficient on the End-of-Grade English test, while 44 percent were proficient in Algebra 1. As a result, approximately 60 percent were promoted to 10th grade.

Midwood received three safety audits during the 2009-2010 year, and we scored a perfect 100 percent on all three. These results were reinforced by student surveys revealing that 89.7 percent of students felt safe at the school. In addition, our parent surveys showed that 93.3 percent of parents felt their child was safe while in school. This was higher than the CMS high school average of 91.6 percent.

Much of our success is due to the hard work of faculty and staff. We have approximately 30 staff members, of whom 100 percent are highly qualified,

and 32 percent have advanced degrees. I credit their wealth of knowledge and experience as major factors in the improvement of our students.

Our destination at Midwood High School is excellence. We strive for this goal each year by reevaluating current practices, identifying areas for improvement and seeking new ways to boost student achievement.

Sincerely,  
Sheila Ijames

## What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

<sup>4</sup> Incidents per 100 students

<sup>2</sup> Required for graduation

multiple survey items may have been used to create a composite

<sup>5</sup> Per 100 students

# CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

## ► Adequate Yearly Progress (AYP)

Our school **DID** make AYP

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit [www.dpi.state.nc.us/nclb/abcayp/overview/ayp](http://www.dpi.state.nc.us/nclb/abcayp/overview/ayp)

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

## ► ABC Designation

Our school's designation: **NA (DID meet growth expectations)**

**Proficiency** 2008-09: 23.7% 2009-10: 55.8%

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (below); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

## ► Average Growth

State Standard	Our School:	2008-09	2009-10
80		80.7	<b>80.9</b>

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Course assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

## ► Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		58.9%	<b>54.6%</b>

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

## ► Adjusted Pass Rate on Advanced Placement (AP) Tests

Expectation	Our School:	2008-09	2009-10
100%		NA	<b>NA</b>

AP tests are administered by the College Board and give students the opportunity to earn college credit. Some high school students are predicted to pass AP tests, based on their performance on the Preliminary SAT (PSAT). This measurement reflects the cumulative AP test success rate among those seniors predicted to pass. It is important to note that all students are encouraged to take AP tests, but in order not to penalize schools for having high expectations for all students, not all scores are included in this measurement.

## ► Participation Rate in Weighted Courses

Expectation	Our School:	2008-09	2009-10
100%		NA	<b>NA</b>

Students with the skills to be successful are defined as those on grade level when entering high school. We offer weighted courses to those students as a means of challenging them academically and encouraging in-depth study within a single subject. The proportion of students who started high school on grade level, and who take three or more weighted courses by the end of senior year, measures how much a school encourages students to push themselves.

## ► Participation Rate in Advanced Placement (AP) or International Baccalaureate (IB) Courses

Expectation	Our School:	2008-09	2009-10
100%		NA	<b>NA</b>

AP and IB courses are the most challenging programs available in high school. The International Baccalaureate is a global educational program recognized for its rigor. Some high school students are predicted to be successful in AP courses, based on their performance on the Preliminary SAT (PSAT). This measures how many of these identified seniors have actually enrolled in AP and IB courses.

## ► Graduation Rate for Students Who Enter Ninth Grade

	2008-09	2009-10
State Comparison:	71.8%	74.2%
<b>Our School:</b>	<b>NA</b>	<b>NA</b>

Students completing kindergarten through 12th grade is a goal for everyone involved in education. We compare the number of students who start ninth grade with those who earn a diploma within four years, taking into account that some students transfer in from other schools and some transfer out of our school.

## ► SAT Rates and Results

Percentage of seniors taking the SAT:	2008-09	2009-10
Nation	46%	47%
State	63%	63%
<b>Our School</b>	<b>NA</b>	<b>NA</b>
<b>Average SAT score:</b>	<b>2008-09</b>	<b>2009-10</b>
Nation	1509	1509
State	1486	1485
<b>Our School</b>	<b>NA</b>	<b>NA</b>

The SAT is a nationally used assessment of high-level math, reading and writing skills. It is used to assess college readiness and the results are calculated by the state. (Data provided by the North Carolina Department of Public Instruction.)

## ► Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	87%	<b>89.7%</b>
Encouragement	97.4%	<b>98.3%</b>
Engagement	85.9%	<b>92.7%</b>

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

## ► Return-on-Investment Index

CMS High School Index: 56.7

**Our School Index: 20.7**

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools.

[Click here for more information.](#)
