

► Renaissance School at Olympic High School

A Message from the Principal

Dear Renaissance School at Olympic High School families:

This is the annual School Progress Report for Renaissance at Olympic High. We are sending this to you so that you may be fully informed about our students' progress, our staff and our school environment.

The Renaissance School at Olympic is a small high school founded by a grant from the Coalition for Essential Schools, an initiative of The Bill & Melinda Gates Foundation. The former Olympic High School campus was divided into five themed schools to improve education for all Olympic students. The program at Renaissance focuses on the arts and social justice.

We are a small, young school, only four years old, but with the support of the community, we have experienced tremendous growth in academic achievement. Our short history has also seen positive shifts in school climate and culture.

I am happy to report that our composite proficiency rate on last year's End-of-Course tests was 90.5 percent, an increase of 23.9 points (without retests) from the previous year, and a total increase of 35.4 points (without retests) over the last two years. As a result of last year's performance, Renaissance achieved High Growth status for the second year in a row, and has been named a North Carolina School of Excellence. Research indicates that small schools like ours typically attain High Growth after five years—we were a full two years ahead of that schedule and continue in that vein. We are not complacent, however, and know we still have work ahead of us to achieve even greater improvement.

Plans are already in place to achieve our goal of reaching 95 percent proficiency on the 2010-2011 End-of-Course tests. We are grouping

2009-2010 KEY FACTS

Data effective as of spring 2010

Grades

9 - 12

School Population

- Students: **357**
- Classroom Teachers: **21**
- Support Staff:
 - 1 Exceptional Children Teacher
 - 0.5 Social Workers
 - 1 Counselor
 - 3 Other

Student Demographics

- African-American.....**35.9%**
- White.....**37.3%**
- Hispanic.....**19.6%**
- Asian.....**3.4%**
- Other.....**3.9%**
- Economically **51.8%** disadvantaged students

Additional Facts*

- Per-pupil expenditure **\$4,763**
- Teacher-to-pupil ratio **1:11**
- Student-mobility rate **20%**

► Renaissance School at Olympic High School

(Principal's message continued)

teachers and administrative staff in teams to research proven teaching strategies, including those from our fellow Olympic schools. We are also using common assessments and other data to drive our teaching, and we review and refine lesson plans on a weekly basis. Objective-mastery charts adorn every classroom and a tutorial program offers help to students who are struggling.

We pride ourselves on providing a safe, nurturing environment at Renaissance. Our safe-school audit rating has remained at 100 percent for the last three years, and surveys indicate that families, students and staff feel comfortable here.

I am pleased to tell you that Renaissance was ranked among *Newsweek* magazine's top 1,500 schools in the nation for our Advanced Placement courses for the third consecutive year. This places us among the top three percent of schools in the country, and we view this as confirmation of our program's academic rigor.

Educators from across the U.S. and around the globe regularly visit Renaissance and our sister schools, drawn by our innovative and effective educational approach. We have other international connections too, courtesy of our student-exchange programs with schools in Denmark and France.

We believe that education is a family affair and we trust that we can also count on you as a regular visitor to Renaissance. We look forward to working with you this year to prepare our bright students for their bright futures.

Sincerely,
Melody Sears
Principal

What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

Renaissance School at Olympic High School

PROGRESS REPORT

CMS 2010 Strategic Plan Goals	Key Performance Measures	CMS 2010 Goal	CMS High Schools 2009 - 2010	Our School 2008 - 2009	Our School 2009 - 2010
<p>High Academic Achievement</p> <p>▶ Because of federal privacy regulations, the actual values for these measures are not shown if the percentage is greater than 95 percent or less than 5 percent.</p> <p>Students who do not pass the End-of-Course tests may take the test again. Retests often raise a school's score at least slightly, because some students pass the test on the second try. Retest results were not included in school scores until 2009-2010. Comparing the 2008-2009 scores and the 2009-2010 scores is therefore not valid, because the scores were not calculated the same way.</p> <p>Disparity between socioeconomic groups is shown as a positive percentage when non-economically disadvantaged students outscore economically disadvantaged students; a negative percentage indicates the reverse.</p> <p><i>Data effective as of 8/27/10</i></p>	▶ Students performing at or above standard on EOC composite tests	80%	84%	60.8%	90.5%
	▶ Students performing at or above standard in English 1 ^{1,2}	—	84.7%	77.8%	92.6%
	▶ Students performing at or above standard in Algebra 1 ^{1,2}	—	83.7%	76.6%	80.5%
	▶ Students performing at or above standard in Civics & Economics ^{1,2}	—	83.1%	70.6%	88.7%
	▶ Students performing at or above standard in U.S. History ^{1,2}	—	88.7%	87.9%	>95%
	▶ Students performing at or above standard in Biology ^{1,2}	—	84.4%	63.9%	>95%
	Disparity between racial/ethnic groups in English 1 ¹	—	17.9%	26.6%	15.8%
	Disparity between racial/ethnic groups in Algebra 1 ¹	—	19%	4.2%	16.5%
	Disparity between racial/ethnic groups in Civics & Economics ¹	—	19.3%	14.8%	23.1%
	Disparity between racial/ethnic groups in U.S. History ¹	—	14%	12.5%	5.3%
	Disparity between racial/ethnic groups in Biology ¹	—	19.4%	33.3%	4.5%
	Disparity between socioeconomic groups in English 1 ¹	—	16.1%	4.4%	-1.2%
	Disparity between socioeconomic groups in Algebra 1 ¹	—	14.8%	-5.8%	3.6%
	Disparity between socioeconomic groups in Civics & Economics ¹	—	16.8%	9.7%	7.4%
	Disparity between socioeconomic groups in U.S. History ¹	—	9.8%	11.9%	2.6%
	Disparity between socioeconomic groups in Biology ¹	—	14.5%	1.5%	-6.3%
<p>Effective Educators</p> <p>Click to view teacher survey results</p>	Teachers deemed highly qualified, having appropriate educational backgrounds and state certification(s) for the grade levels and subjects they are teaching	98%	99%	97%	100%
	National Board-certified teachers	11%	10%	17%	23%

⁵ Per 100 students

CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

► Adequate Yearly Progress (AYP)

Our school **DID NOT** make AYP (*4 of 7 goals met*)

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit www.dpi.state.nc.us/nclb/abcayp/overview/ayp

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

► ABC Designation

Our school's designation: **School of Excellence (DID meet high growth expectations)**

Proficiency 2008-09: 62.6% **2009-10: 90.3%**

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (below); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

► Average Growth

State Standard	Our School:	2008-09	2009-10
80		85.1	87.5

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Course assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

► Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		69%	74.6%

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

► Adjusted Pass Rate on Advanced Placement (AP) Tests

Expectation	Our School:	2008-09	2009-10
100%		54.8%	NA

AP tests are administered by the College Board and give students the opportunity to earn college credit. Some high school students are predicted to pass AP tests, based on their performance on the Preliminary SAT (PSAT). This measurement reflects the cumulative AP test success rate among those seniors predicted to pass. It is important to note that all students are encouraged to take AP tests, but in order not to penalize schools for having high expectations for all students, not all scores are included in this measurement.

► Participation Rate in Weighted Courses

Expectation	Our School:	2008-09	2009-10
100%		94.1%	94.3%

Students with the skills to be successful are defined as those on grade level when entering high school. We offer weighted courses to those students as a means of challenging them academically and encouraging in-depth study within a single subject. The proportion of students who started high school on grade level, and who take three or more weighted courses by the end of senior year, measures how much a school encourages students to push themselves.

► Participation Rate in Advanced Placement (AP) or International Baccalaureate (IB) Courses

Expectation	Our School:	2008-09	2009-10
100%		>95%	NA

AP and IB courses are the most challenging programs available in high school. The International Baccalaureate is a global educational program recognized for its rigor. Some high school students are predicted to be successful in AP courses, based on their performance on the Preliminary SAT (PSAT). This measures how many of these identified seniors have actually enrolled in AP and IB courses.

► Graduation Rate for Students Who Enter Ninth Grade

	2008-09	2009-10
State Comparison:	71.8%	74.2%
Our School:	78.4%	80.7%

Students completing kindergarten through 12th grade is a goal for everyone involved in education. We compare the number of students who start ninth grade with those who earn a diploma within four years, taking into account that some students transfer in from other schools and some transfer out of our school.

► SAT Rates and Results

Percentage of seniors taking the SAT:	2008-09	2009-10
Nation	46%	47%
State	63%	63%
Our School	55.6%	68.2%

Average SAT score:	2008-09	2009-10
Nation	1509	1509
State	1486	1485
Our School	1362	1353

The SAT is a nationally used assessment of high-level math, reading and writing skills. It is used to assess college readiness and the results are calculated by the state. (Data provided by the North Carolina Department of Public Instruction.)

► Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	93.9%	93.7%
Encouragement	97.8%	97.6%
Engagement	96.5%	95.7%

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

► Return-on-Investment Index

	0	33	66	100
CMS High School Index:	56.7			
Our School Index:	64.5			

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools.
