

► Providence High School

A Message from the Principal

To our Providence High School families:

This is the annual School Progress Report for Providence High. We are sending this to you so that you may be fully informed about our students' academic progress, our staff and our school environment.

The academic program at Providence is among the best in the state. Within each discipline, we have developed ways to augment district and state requirements by providing more rigorous activities and learning opportunities. We set high expectations for performance, as you can see by our academic achievements, instilling in our students the desire never to settle for less than their best.

Providence students experienced a phenomenal year in 2009-2010. Our composite proficiency rate on the state End-of-Course tests was more than 95 percent, an increase of more than four percent from the previous year. We also made Adequate Yearly Progress (AYP), the standard set for schools by the No Child Left Behind Act, by meeting all of our targets. Once again, Providence has set the standard by being one of eleven CMS high schools to make AYP. Providence is also the fifth-highest ranking comprehensive (ninth- through 12th-grade) high school in the state.

Last year, our senior class earned more than \$9 million in scholarships, and students were accepted into colleges and universities in 48 states and Canada. We are extremely proud of our students' performance on the Advanced Placement tests: More than 81 percent of students scored high enough to receive college credit for the courses taken.

2009-2010 KEY FACTS

Data effective as of spring 2010

Grades

9 - 12

School Population

- Students: **2,009**
- Classroom Teachers: **102**
- Support Staff:
 - 2 Assistant Principals
 - 1 English as a Second Language Teacher
 - 11 Exceptional Children Teachers
 - 1 Academic Facilitator
 - 5 Counselors
 - 43 Other

Student Demographics

- African-American.....**8.4%**
- White.....**79%**
- Hispanic.....**3.9%**
- Asian.....**7%**
- Other.....**1.7%**
- Economically.....**10.4%** disadvantaged students

Additional Facts*

- Per-pupil expenditure **\$4,687**
- Teacher-to-pupil ratio **1:18**
- Student-mobility rate **8%**

► Providence High School

(Principal's message continued)

The faculty at Providence is highly qualified and rich in experience. More than 18 percent of our licensed staff are National Board-certified and 48 percent hold master's or doctorate degrees. Additionally, we have a low teacher turnover rate, which brings consistency to our work.

Programs at Providence are comprehensive and of high quality. Our teachers create application for knowledge, requiring thoughtful responses rather than simply focusing on facts, and they encourage students to see patterns and connections in their learning. In all classes, a variety of teaching methods and materials is used to convey the material and build a strong foundation of understanding. Teachers are encouraged to take academic risks and extend our students beyond their learning comfort zone.

Providence is a superior school with dedicated staff and students, and supportive parents and community. We strive to continue to grow and improve each year. We are confident that the educational approaches used here will continue to result in high academic performance by our students as we prepare them to be competitive in college, in the work force and in the global economy they will face in the future.

Sincerely,
Tracey Harrill
Principal

What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

REACH FURTHER.

CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

► Adequate Yearly Progress (AYP)

Our school **DID** make AYP (*15 of 15 goals met*)

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit www.dpi.state.nc.us/nclb/abcayp/overview/ayp

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

► ABC Designation

Our school's designation: **Honor School of Excellence (DID meet high growth expectations)**

Proficiency 2008-09: 92.7% 2009-10: >95%

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (below); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

► Average Growth

State Standard	Our School:	2008-09	2009-10
80		84.3	84.6

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Course assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

► Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		66.1%	65.9%

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

► Adjusted Pass Rate on Advanced Placement (AP) Tests

Expectation	Our School:	2008-09	2009-10
100%		86.9%	90.5%

AP tests are administered by the College Board and give students the opportunity to earn college credit. Some high school students are predicted to pass AP tests, based on their performance on the Preliminary SAT (PSAT).

This measurement reflects the cumulative AP test success rate among those seniors predicted to pass. It is important to note that all students are encouraged to take AP tests, but in order not to penalize schools for having high expectations for all students, not all scores are included in this measurement.

► Participation Rate in Weighted Courses

Expectation	Our School:	2008-09	2009-10
100%		92.4%	92.2%

Students with the skills to be successful are defined as those on grade level when entering high school. We offer weighted courses to those students as a means of challenging them academically and encouraging in-depth study within a single subject. The proportion of students who started high school on grade level, and who take three or more weighted courses by the end of senior year, measures how much a school encourages students to push themselves.

► Participation Rate in Advanced Placement (AP) or International Baccalaureate (IB) Courses

Expectation	Our School:	2008-09	2009-10
100%		>95%	93.2%

AP and IB courses are the most challenging programs available in high school. The International Baccalaureate is a global educational program recognized for its rigor. Some high school students are predicted to be successful in AP courses, based on their performance on the Preliminary SAT (PSAT). This measures how many of these identified seniors have actually enrolled in AP and IB courses.

► Graduation Rate for Students Who Enter Ninth Grade

	2008-09	2009-10
State Comparison:	71.8%	74.2%
Our School:	86.7%	91.8%

Students completing kindergarten through 12th grade is a goal for everyone involved in education. We compare the number of students who start ninth grade with those who earn a diploma within four years, taking into account that some students transfer in from other schools and some transfer out of our school.

► SAT Rates and Results

Percentage of seniors taking the SAT:	2008-09	2009-10
Nation	46%	47%
State	63%	63%
Our School	80.2%	89%

Average SAT score:	2008-09	2009-10
Nation	1509	1509
State	1486	1485
Our School	1708	1710

The SAT is a nationally used assessment of high-level math, reading and writing skills. It is used to assess college readiness and the results are calculated by the state. (Data provided by the North Carolina Department of Public Instruction.)

► Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	85.6%	85.3%
Encouragement	93%	93.4%
Engagement	90.5%	90.9%

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

► Return-on-Investment Index

CMS High School Index: 56.7
Our School Index: 66.8

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools.
