

▶ Statesville Road Elementary School

A Message from the Principal

Dear Statesville Road Elementary School parents:

This is the annual School Progress Report for Statesville Road Elementary. We are sending this to you so that you may be fully informed about our students' academic progress, our staff and our school environment.

On the 2009-2010 End-of-Grade tests, our school's overall performance composite score for reading, math and fifth-grade science was 57.8 percent, an increase from last year's performance composite of 49.9 percent.

As a diverse school, we have a number of targets to meet for Adequate Yearly Progress (AYP), the standard set for schools by the No Child Left Behind Act. We are proud that our school met all 17 of our targets, which means that we met all of our subgroup goals for AYP.

We will continue to work diligently to introduce strategies aimed at increasing student achievement, not only in reading, but also in math, science and other subject areas. Last year, we hired two intermediate certified tutors to support students in grades three through five. This year, we have introduced academic facilitators for kindergarten through second grade and third- through fifth-grade to work closely with teachers and students in core instructional areas. These various appointments will help to provide additional support to staff and students at Statesville Road. In addition, we were awarded a 21st Century Learning Grant from Quality Resources, Inc. to give further academic help to select third- through fifth-grade students.

As your principal, I believe that we should view every child as an individual and thereby ensure academic success for all students. I commit to making interventions as necessary based on assessment data. This year, we will continue to examine our data closely in order

(Principal's message continued on next page)

2009-2010 KEY FACTS

Data effective as of spring 2010

Grades

K - 5

Statesville Road Elementary School is a partial International Baccalaureate magnet.

School Population

- Students: **525**
- Classroom Teachers: **31**
- Support Staff:
 - 1 Assistant Principal
 - 1 English as a Second Language Teacher
 - 1 Speech Pathologist
 - 5.5 Exceptional Children Teachers
 - 0.5 Social Workers
 - 2 Academic Facilitators
 - 0.6 Talent Development Teachers
 - 1 Counselor
 - 30 Other

Student Demographics

- African-American..... **73.7%**
- White..... **5.3%**
- Hispanic..... **9.9%**
- Asian..... **5.7%**
- Other..... **5.3%**
- Economically **85%** disadvantaged students

Additional Facts*

- Per-pupil expenditure **\$6,345**
- Teacher-to-pupil ratio **1:20**
- Student-mobility rate **24%**

▶ Statesville Road Elementary School

(Principal's message continued)

to focus on specific academic areas and subgroups requiring additional academic support. I assure you that we will continue to work diligently to meet CMS and state goals.

More than 75 percent of our students are deemed economically disadvantaged. As a result, Statesville Road has been designated a Title I school, which means that we will receive federal funding this year to improve our academic programs and better address our students' needs. With this in mind, educators and administrators will work closely together to improve student learning. At each planning session, we will ask ourselves three questions: What do we expect our students to learn? How will we know when they have learned it? How will we respond when they do not? This kind of self-questioning will help us constantly and consistently critique what we are teaching and carefully monitor our students' learning progress on a daily basis.

Statesville Road is a magnet school offering the International Baccalaureate (IB) Primary Years Programme. In spring 2010, we were reevaluated by the IB organization and we were pleased to retain our status after receiving a favorable report. We will continue to fine-tune our integrated units of study and increase students' global awareness through the study of a variety of multicultural literature. With all the plans we have put in place, I am confident that we will see further academic achievement this school year.

Sincerely,
Ronnie Scott
Principal

What is the School Progress Report?

In 2006, we introduced the *Charlotte-Mecklenburg Schools Strategic Plan 2010* outlining our vision and strategy to educate our students to compete locally, nationally and internationally.

The plan outlines seven areas of concentration: high academic achievement; effective educators; adequate resources and facilities; safe and orderly schools; freedom and flexibility with accountability; world-class service, and strong parent and community connections. This report summarizes how our school performed in the 2009-10 school year in making progress on these seven goals. On the final page, you will also find an explanation of federal and state accountability measures.

Educators and parents have a common goal of preparing our children to compete in an ever-growing global community. Working together requires frequent dialogue between school and parents, so please feel free to contact the principal or any staff member at our school.

REACH FURTHER.

⁴Per 100 students

CMS Accountability Measures

The learning of students in public education is measured in multiple ways. There are assessments given at regular intervals by CMS—tests that we use to measure how students are learning as the school year progresses. Other tests are required by the state and given once or twice a year, such as End-of-Course and End-of-Grade tests. Some of the state test results are also used to calculate district progress on the federal standard of Adequate Yearly Progress for each student. This page provides brief explanations of some of the measures and tests used in CMS.

▶ Adequate Yearly Progress (AYP)

Our school **DID** make AYP
(17 of 17 goals met)

The federal No Child Left Behind Act requires that every school make Adequate Yearly Progress (AYP). AYP is an all-or-nothing standard: Every target must be met.

State test results are used to set AYP targets. There are separate targets for the school as a whole and for nine subgroups of students: white, black, Hispanic, Native American, Asian, multiracial, economically disadvantaged students, students with limited English proficiency and students with disabilities. Subgroups of students are measured separately so that an overall score for a class or a school does not mask poor results within a subgroup.

Some schools are more diverse than others, so the number of subgroups varies by school. Therefore, the number of AYP targets varies by school, too. Some schools may have only a few targets to meet; others may have the maximum, which is 41. School attendance and graduation rates are also measured for AYP.

For a more complete overview of AYP, visit www.dpi.state.nc.us/nclb/abcayp/overview/ayp

For details of AYP results for our school and its student groups, visit <http://ayp.ncpublicschools.org>

▶ ABC Designation

Our school's designation: **Priority School**
(**DID meet growth expectations**)

Proficiency:	2008-09	2009-10
	49.9%	57.8%

The North Carolina ABCs program was introduced more than a decade ago to help schools improve. It uses two basic measures to assess a school's performance: the Average Growth of students (at right); and the Performance Composite, which measures how well students performed against a state-set standard of academic achievement.

Schools are given one of seven designations. In descending order, they are: Honor School of Excellence, School of Excellence, School of Distinction, School of Progress, No Recognition, Priority School, and Low Performing.

For more information about ABCs, visit <http://abcs.ncpublicschools.org/abcs>

▶ Average Growth

State Standard	Our School:	2008-09	2009-10
80		80.3	81

Did our students meet the state's expectation for academic growth? Each student is expected to perform as well (or better) on the End-of-Grade assessment as he or she did, on average, during the previous two years. Average Growth for a school is calculated by comparing actual performance to expected performance and then averaging the difference across all students and all subjects. The score above reflects the combined growth rate of all of our students. To make expected growth, a school must have a score of 80 or higher.

▶ Amount of Growth for Students in the Lowest-Achieving Group

Our School 2008-09: 80.5 **Our School 2009-10: 71.4**

Are we helping our low achievers catch up? Historically, some economically disadvantaged and minority students have trailed their classmates in academic achievement. This is called the achievement gap, and closing it is one of the biggest challenges in public education. If the lower-achieving students at a school show academic growth at a faster rate than higher-achieving students, the achievement gap is narrowed. When the score for this measure is higher than the Average Growth for the school, the school is closing the achievement gap.

▶ Students Making or Exceeding a Year's Worth of Growth

State Standard	Our School:	2008-09	2009-10
60%		54.3%	54.6%

Did our students learn as much as they were expected to learn this year? As described above, the state sets expectations for each student based on individual performance for the previous two years. Across the state, about half of students typically meet or exceed this growth expectation. To earn the high-growth designation, a school must meet the average-growth standard described above and also have more than 60% of its students make expected growth.

▶ Positive Responses to Student Survey Items

Our School's Results:	2008-09	2009-10
Safety	93.2%	88.1%
Encouragement	96.8%	98.4%
Engagement	96.4%	97.9%

Is our school environment conducive to learning? This measure is subjective—it is taken from a student survey.

[Click to view student survey results.](#)

▶ Return-on-Investment Index

CMS Elementary School Index: 50.9 **Our School Index: 41.8**

Return on Investment is calculated by comparing students' academic growth to the per-pupil expenditure. This measure is intended to help parents and community members understand how money is spent in our schools. [Click here for more information.](#)
